Exterpark Revolution in 2'54" music video

46 YEARS TRADITION Barcelona since 1977

We manufacture indoor and outdoor wood floors for **46 years** with a firm commitment to:

Quality · Reliability · Innovation

Our floors have been embraced in all kinds of projects in more than **50 countries** worldwide, featuring collaborations with internationally known architects such as **Frank Gehry, Jean Nouvel, Santiago Calatrava, Norman Foster** and **GSAarquitectos**.

R+D+I · Experience · Know-How

Stimulates us to improve our products and find better solutions to be one step ahead.

1995 · Exterpark Classic

We invented and patented the first hidden fastening system clip for decks. This has become today the standard fixing system for most producers worldwide. No more screws on the surface.

2004 · The invisible profile patent

Our profile evolved with a subtle modification. The understructure was not visible, loss of valuables was no longer a concern and our decks became safer and cleaner for the users. Our most spread technology, for the time being, is enjoyed all around the world.

2012 · Speedclip

Launching of our third patented innovation. Our first contribution to making installation easier, screw-less, definitely faster and cost-efficient.

2014 · The Magnet: worldwide patent granted

The Magnet is the best system we have ever developed.

A system that works for virtually any kind of surface featuring multiple virtues: **versatility, total accessibility** and **reusability**

2019 · Innovation is our passion

We file a new patent for the **first accessible & zero screws chevron and herringbone decking**.

2023 · The new Magnet S patent filing

2023 CHANGE THE PATTERN & RAISE THE STANDARDS

INNOVATION IS OUR PASSION

5 GAME CHANGERS

1. INVISIBLE PROFILE

Our patented invisible profile is an absolute winner, and it just looks so much better.

A SUBTLE DIFFERENCE WHICH MAKES A BIG DIFFERENCE

2. NO SCREWS

A smart fixing method which has been acknowledged by the industry as the best system available. Our mechanical locking is strong yet flexible. It will always allow us to go back.

MAINTENANCE FRIENDLY AND VERY GENTLE FOR THE USER

3. 100% ACCESSIBLE

We have created the most flexible system enabling you to have access anytime, anywhere in two seconds.

EMBRACE FLEXIBILITY AS ONE OF YOUR BEST ALLIES

4. 2x FASTER

Installation has never been so fast and easy.

FASTER TO INSTALL. FASTER TO REMOVE

5. ALUMINIUM JOISTS

Choosing the right substructure is choosing the right foundation and our aluminium is:

STRAIGHT LIKE AN ARROW AND STABLE AS A ROCK

1 invisible profile

1.1 HYGIENIC

Food & leaves can't fall down

1.2 BETTER LOOK

No gaps & no understructure to be seen

Who prefers open gaps between boards...

when it can look like this? Smart!

2.3. NO LO\$\$ OF VALUABLES

Don't lose your mobile.
Don't lose your coins.
Don't lose your ring.

2.4. SAFER

Dress to impress.
No more heels stuck.

Patented invisible profile system
with 4mm spacing for optimal drainage and ventilation.

screwless installation

- NO SCREWS
- NO PREDRILLING
- NO TOOLS
- NO NOISE
- NO SPLINTERS

 **the magnet®**

An advanced mechanical locking with a superior grip which holds boards stronger than a screw but yet flexible to open up and close again when necessary.

Who likes screwdrivers & the noise they make?

100% accessible

Full access to decks, walls, and ceilings.

- **FLEXIBILITY** as your best ally
- **MAINTENANCE** friendly
- **EASY** substitution of boards

Made a mistake? No problem, open and try again.

2x faster

Faster to install. Faster to remove.

- **EASIEST INSTALLATION**
- **COST-EFFICIENT**
- **TIME-EFFICIENT**

Place and lock in one move

CLIP LOCK IN **3 SECONDS**

TOTAL ACCESS IN **2 SECONDS**

A solid rock substructure

Improved loading capacity to more than 4.000kgs per sqm.
Superior mechanical properties to hold clips.
Upgraded stability: will remain straight, it won't warp nor decay.
Enlarged service life 25 years warranty for aluminium joists.
Save costs and time by using fewer pedestals.
Fixed lengths of 2.200mm.

Double
54 x 32 mm

COMPLETE SOLUTIONS

Our **double joist** is the crucial point, on which all the beginnings and ends of boards must rest.

Our **double joist** is essential for the correct installation of the product, leaving 4mm of expansion space between the boards of Tech WPC products.

aluminium joists

The **BEST SUBSTRUCTURE** for a **SOLID FOUNDATION**

Ⓜ the magnet[®] system works around **4 essential elements**

- 1. Aluminium joists** with very specific and accurate geometry for the magnet clip to click inside
- 2. Blockers** to keep all boards always in the same place and prevent longitudinal movement
- 3. The magnet tool**, opens any board of our deck in two seconds
- 4. Magnet clip** is an advanced mechanical locking with a superior grip which holds boards stronger than a screw but yet flexible to open up and close again when necessary

- The **magnet clip** is the **cornerstone** of the system
- A secret formula combining two types of **POM** gives to the magnet clip the **top strength** (more than 330km wind lift test) with the **right flexibility**
- **POM** is widely used in the automotive and electronic industry
- **Low friction coefficient** and **high abrasion resistance**
- Withstands **-40°C** to **+90°C**
- Durability test: **2 million** impact cycles in perfect conditions

PATENTED

magnet clip

PATENTED WORLDWIDE

Makes decks, walls, and ceilings,
100% accessible.

The **clip magnet** is fully made of **POM**, a high-performance engineering thermoplastic with excellent dimensional stability even in extreme conditions.

Endurance

Durability test 2 million impact cycles

Uplift

Wind test more than 330km/h

Traction

Golf car test at 25km/h

blocker

To prevent longitudinal movements.

For those who look for a solid rock foundation
and a **solid rock** deck

Tech Cube is the first combo WPC board designed to fit 2 different installations systems

1 Magnet Clip

Improve it
by making
it accessible
with the
Magnet system.

2 Screwdown clip

Remain conservative
(not encouraged
by Exterpark)
and use screw
down clip.

Tech Cube is the only WPC board to combine 3 patented technologies in one deck system

Committed to the environment and the responsible management of the forests of our planet.

We strive to bring the best of nature to your living environment.

thinking green

Extended life and possibility of reuse

We manufacture using sustainable sources such as FSC® certified wood. Search for our FSC® certified products.

Furthermore, Exterpark Magnet features certain characteristics that provide credits for the green LEED building certification.

A sustainable and responsible choice

Wood is one of the most durable and respectful materials with the environment. Its carbon footprint is much smaller than that of other fossil-based building materials.

The presence of wood in the house reduces stress. The reason is that wood provides a balance between body and mind due to its chemical composition very similar to that of the human body. It improves the health, well-being and quality of our lives by providing the comfort and relaxation necessary for the reconnection and daily regeneration of our body and mind.

our factory

We take care of the forest management,
the selective cutting of wood, the drying in our ovens
and the manufacturing and finishing of our products.

We control the entire value chain.
